

SVSR

SEWER VENT SUPPLIES & REPAIRS

SVSR specialise in:

- Removal and replacement of aging, deteriorating sewer vents for Regional Councils and Water Agencies.
- Difficult vent shaft access eg. Residents backyards; working near roadways, overhead power lines and underground services.
- Detailed design advice, odour/gas assessment and condition assessment of existing vent shafts; helping you plan your maintenance budget.
- Manufacturing and supplying new sewer vents for installation by SVSR or Council.
- Ensuring maintenance free service for years to come.
